

Weatherproof junction boxes

The 1300 are used as junction boxes in outdoor installations or indoors where dripping water is a problem. These enclosures are designed to protect equipment against rain, sleet and snow. Enclosures are made from 16 GA steel. The top of the enclosure

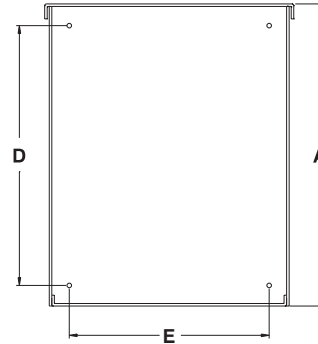

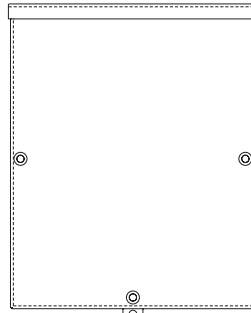

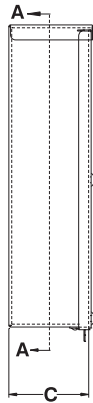

serves as a dripshield. The cover slips on and is fastened by screws. Four internal mounting holes are provided.

Enclosures are finished with heat fused powder paint, electrostatically applied on a pretreated base. Box is ANSI/ASA 61 gray (other col-

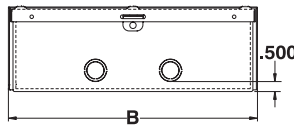

ors available).

**CSA Certified / UL Listed
NEMA/EEMAC 3R / IP22**

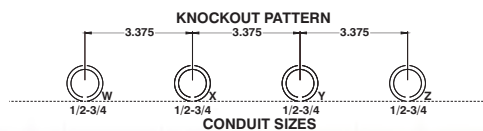

**Refer to p.727 to validate choice
of substrate for the application**
