

Stainless steel bus bar splitter troughs

The 1400 BTSS bus bar splitter troughs are used indoors or outdoors to house bus bars for power distribution. Troughs and covers are made from 14 GA stainless steel, with corner seams continuously welded. The opening has a curled lip around all sides to prevent dripping water from entering the enclosure when the door is open, it also increases rigidity. A high quality robotically

poured-in-place gasket ensures a complete and durable water tight seal. The captive pins of the concealed hinges can be pulled to remove the door. Quarter turn mechanisms ensure positive closing. Troughs are available in configurations of 3, 4 or 5 aluminum, tin plated bus bars that mount on slanted insulators, which are installed on an inner panel. Lugs must be ordered sep-

arately. There are no knockouts. Bus bars are also available drilled and tapped 1/4 - 20 at 6" interval. Add suffix 'DT' to the catalog number (ie. 1400BTSS...DT). Troughs are unpainted and brushed smooth. The enclosure's interior and the inner panel are powder coated white.

CSA Certified
