

Single bay frame

The **6500 MX** is the base frame of a Mtrx cabinet. The fully welded frame is made of powder coated **electro-galvanized steel and steel cast corners**. The tube-shaped roller formed design features an exclusive stiffening rib. This special stiffening rib consists

of three layers of material (4.5mm) all along the frame's inner edges. The frame design is fully symmetric. This facilitates installation and accessory selection. A hole pattern which can accommodate front inserted M8 clip nuts is present at 25 mm

increments. Self-tapping holes for M5 screws are provided. Inner panel sliding rails, eyebolts and leveling feet are also provided. The frame is RAL7011 sandtex dark gray.

STEP 1: INSERT INTO RECTANGULAR CUTOUT

STEP 2: ROTATE AND SLIDE INTO CUTOUT

STEP 3: PUSH UNTIL SPRING IS ENGAGED

All modular frames are supplied with a hole pattern offset every 25mm to accommodate the installation of front inserted clip nuts (p.148) in all three axes. Refer to steps for installation

FOR M5 SELF TAPPING HARDWARE (880 HDT14, SEE PAGE 472)

FOR M5, M6 OR M8 FRONT INSERTED CLIP NUTS (880 HDFM, SEE PAGE 473)
