

Rear cover with access panel for single bay cabinet

The **6500 MXRP Access panel rear covers** are installed on the front and/or back face of a Mtrx single bay cabinet. They are made of steel. These covers were developed for applications where access is required or limited to the lower portion of the enclosure.

This approach enables the handling and possible modifications of much smaller panels should wiring or piping be routed via the front or rear of the enclosure. Rear cover kits are supplied standard with: (i) all installation hardware and flush mounting screws;

(ii) durable robotically poured-in-place gaskets; (iii) horizontal mullion to retain NEMA 12 rating. Finish is powder coated RAL7035 textured light gray.
