Universal adaptor plate for 60mm system

The **universal adaptor plates** are devices used for mounting and connecting 3 pole equipment and breakers directly onto the three phases of the busbars. The adaptors can be snapped into place on any busbar type (Flat, Double-T, Triple-T). **UR / CSA**

Note: Circuit breakers not included; All adaptors with the exception of 866 32262 are for all busbar types

Catalog number	Adaptor plate description / type	Height (mm)	Width (mm)	UL (UL508A)	CSA
Universal busbar adaptor					
Note: standard fit is for all commercially available switchgear with M4 fixing screws. For M5 and M6 screws the sliding nuts must be replaced accordingly (see accessories below)					
866 32214	200A top connection to system	222	108	UR	✓
