

Dual access free standing single door enclosure

The 9500 DA oil & dust tight enclosures are used indoors for protection against dust, dirt or oil splashing. The 9500 DA are made from quality code gauge steel, with corner seams continuously welded. The opening has a curled lip around all sides to prevent dripping water from entering the enclosure when the door is open, it also increases rigidity. A high quality robotically poured-in-

place seamless gasket ensures a complete and durable oil & dust tight seal. There are doors on both sides of the cabinet. The captive pins of the concealed hinges can be pulled to remove the doors. An automotive locking handle ensures smooth, secure 3-point latching. Optional back panels can be mounted at any depth, using the three sets of rails welded on the sides of the cabi-

net. Side panels can also be ordered separately. A print pocket is provided. Enclosures and panels are finished with heat fused polyester powder, electrostatically applied on a pretreated base. Box is ANSI/ASA 61 gray, panel is white (other colors available).
