

Light duty joining brackets

The 6500 MXJ05 light duty joining brackets are used to join Mtrx modular cabinets once they are being joined at their final on site location.

Note: These joining brackets are not to be used where line-ups are to be transported in one piece.

6500 MXJ06	External / Internal rapid joining brackets

MX/SL
COMPATIBLE

Joining panel

The 6500 MXMJ joining panel is installed between adjacent mounting panels of cabinets (6500 MXM) being joined together in order to provide one continuous and removable mounting surface within the full height and width of the line-up.

Note: Adjacent inner panels are required to be installed 25mm forward to accommodate.
